INCL. SENSOR

Your hands are full and you can't reach the light switch? Then choose our LED wall and ceiling lamps with an integrated high frequency sensor. These combine the advantages of LED technology with the advantages of a sensor:

- The special high frequency sensor is mounted invisibly behind the glass. Whether you mount it on the wall or on the ceiling, the sensor works with both methods and is particularly well suited for rooms in which you only stay in for a short time.
- Even higher cost savings and more comfort thanks to the automatic on/off switching of the lamp.
- 360° detection angle und high detection range of about 25m².
- The sensor can be individually adjusted to your needs: light time from 3 to 25 minutes and ambient brightness from 2 to 2000 lux.

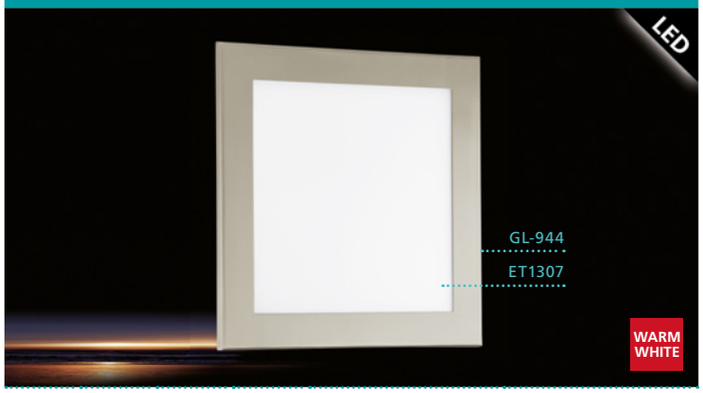

Sie haben beide Hände voll und können den Lichtschalter nicht erreichen? Dann steigen Sie einfach auf unsere LED Wand- und Deckenleuchten mit integriertem Hochfrequenzsensor um. Diese vereinen die Vorteile der LED Technologie mit den Vorteilen eines Sensors:

- Der spezielle Hochfrequenzsensor ist unsichtbar hinter dem Glas versteckt. Egal ob an der Wand oder an der Decke montiert, der Sensor funktioniert bei beiden Montagearten und eignet sich besonders für Räume mit kurzer Verweildauer.
- Eine noch höhere Kostenersparnis und mehr Komfort durch automatisches Ein- und Ausschalten des Lichtes.
- 360° Erfassungswinkel und hohe Reichweite von bis zu 25m².
- Der Sensor kann auf die individuellen Bedürfnisse angepasst werden: die Leuchtdauer reicht von 3 bis zu 25 Minuten und die Helligkeitsempfindlichkeit von 2 bis 2000 lux.

Vous avez les mains prises et ne pouvez pas allumer la lumière? Avec nos appliques et plafonniers LED avec capteur d'haute fréquence intégré vous pouvez résoudre ce problème! Ces luminaires combinent les avantages de la technologie LED avec les avantages d'un capteur:

- *Le capteur d' haute fréquence est invisible. N'importe si vous installez le luminaire sur le plafond ou le mur, le capteur fonctionne bien et se prête spécialement aux espaces avec durée de présence courte.*
- *Économie réalisée sur les coûtes encore plus haute et plus de confort grâce à l'allumage et l'arrêt automatique de la lumière.*
- *Angle de perception 360° et haute portée jusqu'à 25m².*
- *Le capteur peut être adapté aux besoins individuels: durée de l'allumage de 3 à 25 minutes et sensibilité de luminosité de 2 à 2000 lux.*

92305 - HEAT SHRINK TUBE

The heat shrink tube provides better protection against moisture and dust. With the help of a industrial hot air blower you can shrink the tube. The tube can be cut in half and used for two connections.

Mit dem praktischen Schrumpfschlauch schützen Sie die Verbindungsstellen zwischen den Stripes noch besser vor Staub und Feuchtigkeit. Mit Hilfe eines Industrie-Heißluftföns wird dieser geschrumpft. Der Schlauch kann halbiert und für zwei Verbindungen verwendet werden.

Une gaine contractile protege encore mieux contre l'humidité y la poussière. Se peut fondre avec un sécheur industriel. La gaine peut être coupée en deux et utilisée pour deux connexions.

MY CHOICE
HOOK & LOOP

The new MY CHOICE range from EGLO is a paradise for individualists and the indecisive. With 60 variants we enable you to create your own, personal light.

The assembly is easy and quick: all shades can be mounted and changed quickly by using a simple hook-and-loop fastener. The only difficult part is which of the many shades to choose. We recommend you take a second or third shade with you, just in case.

Die neue MY CHOICE Serie von EGLO ist ein Traum für alle Individualisten und Unentschlossene. Mit 60 Variationen können Sie sich Ihre eigene, persönliche Leuchte zusammenstellen.

Die Montage ist kinderleicht. Die Schirme können schnell und einfach per Klettverschluss angebracht bzw. ausgewechselt werden. Das einzige schwierige ist die Qual der Wahl: Welchen Schirm soll ich nehmen? Am besten gleich einen zweiten oder dritten zum Wechseln mitnehmen. Nur für alle Fälle.

La nouvelle serie MY CHOICE d' EGLO est un rêve pour tous les individualistes. Vous pouvez créer votre lampe personnelle avec plus de 60 variations.

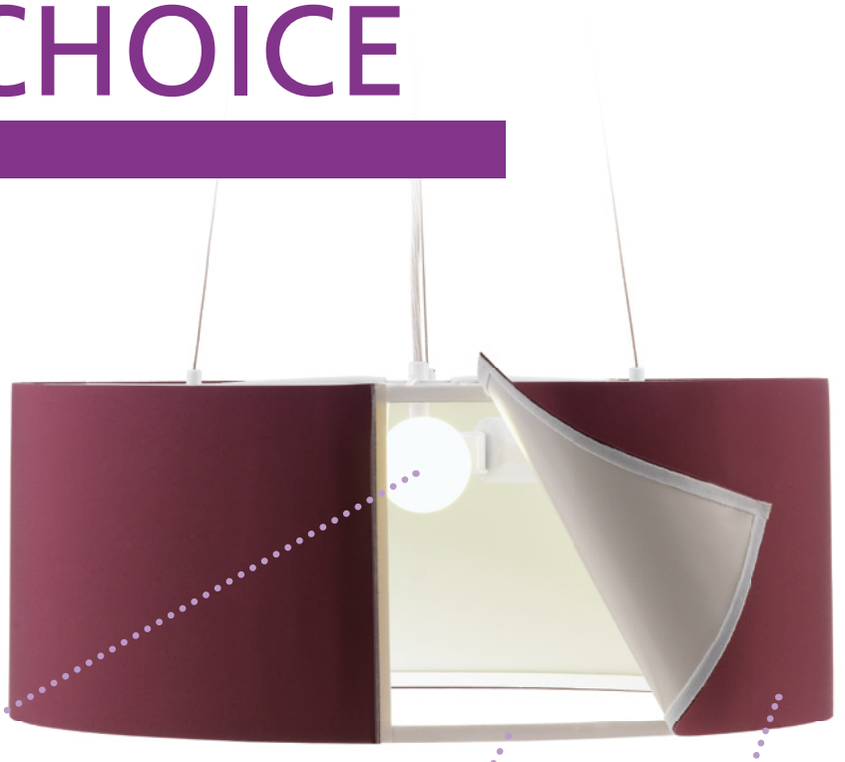

Le montage est un jeu d'enfant. Les abat-jours peuvent être montés ou changés simplement avec une fermeture velcro. L'unique probleme est que vous avez l'embarras du choix de l'abat-jour. Notre solution: prendre un deuxième ou troisième abat-jour pour changer. Juste en cas...

COCOON® THE ORIGINAL

About 5,000 years ago, a small caterpillar started to write COCOON® history: the silkworm, the larva of the silkworm moth, builds a cocoon for pupation from a filament that is up to 900 metres long. It is performing the heaviest work in the process as it needs to wrap itself up with up to 300,000 loops.

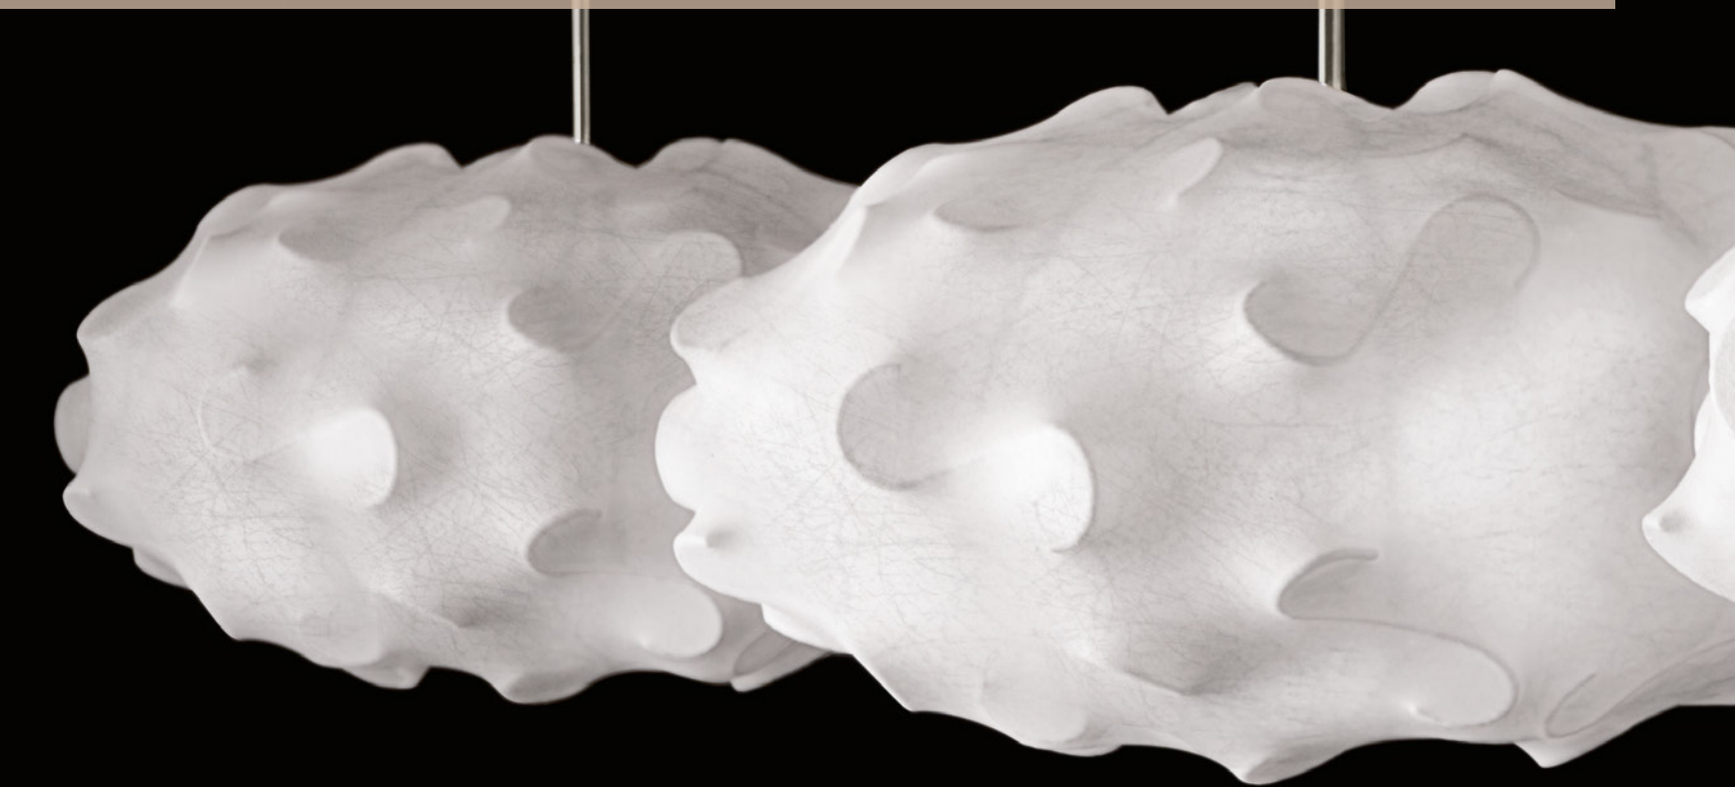

We have taken this method as a model for the production of our COCOON® luminaires. COCOON® a unique special formula licensed by EGLO from which an extremely resilient and elastic material is produced. Models of any kind can be covered with a diaphragm. The variety of shapes allows almost infinite possibilities, and only the sky is the limit in terms of designer creativity.

Eine kleine Raupe hat bereits vor ca. 5.000 Jahren COCOON®-Geschichte geschrieben: die Seidenraupe, die Larve des Seidenspinners, baut sich zur Verpuppung einen Kokon aus einem einzigen bis zu 900 Meter langen Faden. Sie leistet dabei Schwerstarbeit, muss sie doch bis zu 300.000 Schlaufen um sich herum legen.

Zur Produktion unserer COCOON® Leuchten haben wir uns dieses Verfahren zum Vorbild genommen. Als COCOON® wird eine von EGLO lizenzierte und einzigartige Spezial-Rezeptur bezeichnet, mit der ein extrem belastbares und elastisches Material hergestellt wird. Modelle jeglicher Art können mit einer Membran bespannt werden. Die Formenvielfalt ist somit schier unendlich und der Kreativität der Designer sind keine Grenzen gesetzt.

Un petit ver écrivait l'histoire COCOON® il y a env. 5000 ans : le ver à soie, la larve du tisseur de soie se construit un cocon à partir d'une seul fil pouvant atteindre 900 mètres pour se transformer en chrysalide. C'est un travail laborieux car elle doit enrouler le fil jusqu'à 300 000 fois autour d'elle.

Pour produire nos luminaires COCOON®, nous nous sommes basés sur cette façon de faire. COCOON® désigne un procédé spécial et unique breveté par EGLO qui permet de fabriquer un matériau extrêmement résistant et élastique. Tous les types de modèles peuvent être recouverts d'une membrane. La diversité des formes est donc infinie et les designers peuvent laisser libre cours à leur créativité.

The colours of the LED are represented as pictogrammes (see below), their luminous flux directly beneath. The luminous flux is quoted in lumen and describes the amount of light generated by the LED. The higher the value, the brighter is the lamp.

Die Farben der LED werden als Piktogramm (siehe unten) dargestellt, deren Lichtstrom direkt darunter. Der Lichtstrom wird in Lumen gemessen und gibt die erzeugte Lichtmenge der LED an. Je höher der Wert, desto heller das Produkt.

Les couleurs de LED ont représentés sous forme de pictogrammes, leur flux lumineux directement en dessous. L'unité de flux lumineux est le lumen et il mesure la quantité de lumière générée par les LED. Plus la valeur est élevée, plus la lampe est lumineuse.
